EERD – Aegis Digital Forensics: 5G Incident Response Platform

COS326 Database Systems – Practical 2 (2026)

Jaitin Moodally
u23621372

Sequences: incident_seq drives Incident.incident_id (shared by NetworkIncident & NodeBreachIncident); evidence_seq drives EvidenceCatalog.hash_id.
Table inheritance: NetworkIncident and NodeBreachIncident are created with INHERITS (Incident) — PostgreSQL ORDBMS table inheritance, not a foreign-key relationship.
